CHERRIES

We are the largest distributors of cherry trees in this section. Our output of Montmorency cherries is enormous, enabling us to sell at cost of production, plus overhead and a very small profit. Nothing pays better than a cherry orchard. Tell us how many trees you will buy and we will guarantee to save you money.

BEARING AGE TREES

Many people ordering fruit trees, ask us if we can supply "bearing" size trees. While it is impossible to furnish trees that will bear at once after transplanting, yet through a method employed in growing and selecting, which we have successfully developed, we are able to offer these extra size trees of apples, cherries, pears and plums at prices that compare favorably with those of most firms offering just ordinary stock. If you wish these large sizes, which are from $\frac{1}{2}$ inch to 1 inch in diameter, and from 5 feet to 7 feet high, depending upon variety, they are available in all kinds listed and described in this catalogue.

29 Varieties to Choose From

SUMMER APPLES

Golden Sweet. Large fine yellow sweet apple. Very productive. August and September.

Red Astrachan. Large crimson, showy, sub acid flavor. Bears early and is very hardy. July.

Yellow Transparent. The hardiest and finest early Apple grown. Ten days earlier than Early Harvest. Fruit large; pale yellow, sub-acid. A very young bearer and entirely hardy. One of the best market sorts.

FALL AND EARLY WINTER APPLES

Chenango Strawberry. (Sherwoods Favorite) bright red and yellow. Bears early, August & September.

Duchess of Oldenberg. Grows and yields good crops even in the Northwest. Fine pie and cooking apple.

Fameuse (Snow Apple). Very productive and good seller.

Maiden Blush. Brings fancy prices early in fall.

Wealthy. Early fall. Large, round Apple with smooth skin and dark red markings. Flesh white, tender and sub-acid.

Wolf River. Very large variety. Sub-acid flavor.

WINTER APPLES

Always Bring Good Prices

AN ACRE OF APPLES BEATS 10 ACRES OF WHEAT

- Baldwin.** A good standard variety that keeps well and brings good prices.
- Cortland.** An early producing tree. And a well flavored apple that is quite popular.
- Delicious.** A hardy, young bearer, large fruit, beautifully colored and truly delicious flavor.
- Golden Russet.** Keeps till late in spring.
- Grimes Golden.** Fruit medium to large. Bright yellow with pink cheek, fine grained, juicy with pleasant flavor.
- Hubbardston Nonesuch.** Large Yellow Apple, fine flavored.
- Jonathan.** A beautiful red Apple, highly flavored, bears when young and is very productive.
- King.** A very large Apple. Yellow striped. Annual bearer.
- McIntosh.** Late Fall. Bright red, spicy flavored, medium sized fruit. Ranks high for home or market use.
- Northern Spy.** Famous wherever apples are raised. - Always brings top notch prices, especially in Michigan.
- Northwestern Greening.** Long keeper, decidedly favored as a pie and cooking apple.
- Rome Beauty.** Bears annually, good keeper.
- Rhode Island Greening.** A good keeper. Rather acid flavor.
- Staymans Winesap.** Keeps November to April.
- Talman Sweet.** Rich, firm, sweet apple. November to April.
- Wagener.** Bears young and yields annual crops.
- Winter Banana.** Tender and delicious.
- York Imperial.** Crisp and juicy winter apple.

CRAB APPLES

- Hyslop.** Large; dark crimson, with bloom; very showy. Tree very hardy; late.
- Transcendent.** The largest Crab Apple. Red; showy; excellent. September to October.

SOUR CHERRIES

Compass. Larger than the Early Richmond. Produces first year after planting. A perfectly hardy variety.

Early Richmond (English Pie Cherry) ripens in June.

English Morello. Dwarf slender tree. Deep red cherries.

MONTMORENCY. The best cherry for home and market. Large size, red in color, short stem. Young bearer that is vigorous and hardy.

SWEET CHERRIES

BLACK TARTARIAN. Very large black cherry. Late June.

WINDSOR. Large liver colored, late sweet. July.

GOV. WOOD. Large, deep yellow, shaded red.

LAMBERT. One of the largest of all Cherries. It is purple-red; firm and rich. Every year sees an enormous crop, and the tree not only grows well, but is proof against insects and fungus attacks.

ROYAL ANNE (Napoleon). Magnificent Cherry of large size; pale yellow with red cheek. Good for canning and shipping. July.

SCHMIDT'S BIGARREAU. Remarkably hardy and productive. Fruit of the largest size; a deep mahogany color; flesh dark, tender, juicy with a fine, rich flavor. Stone small. Good for canning. July.

EUROPEAN VARIETIES

Lombard. Medium size; somewhat oval in shape; violet-red; juicy; pleasant and good. Very hardy. One of the very best varieties to plant. Do not fail to include some of these in your order. August.

German Prune. Medium sized, long; purple; flesh green, sweet; freestone; excellent quality.

Bradshaw, dark violet red, juicy and good.

Fellenberg or Italian Prune. Large, oval, purple plum.

Reine Claude, (Bavays Green Gage). Large, greenish yellow.

Shippers Pride. Dark purple. Good keeper.

Shropshire Damson. Best for preserving.

Abundance. Hardy and very productive; fruit large, and pinkish red in color, August.

Burbank. Medium to large; flesh deep yellow, firm and juicy, fine flavor; small pit. Excellent for table and canning. Bears very young and produces heavy crops. August.

Banner. Large yellow Peach. Good shipper. Sept.

Champion. Unusually large. A sweet, rich, juicy, freestone, beautifully colored with creamy white and crimson; a good shipper. Hardy, productive, profitable. August.

Crawfords Early. Large yellow Peach. Late August.

Crawfords Late. Similar to Crawfords Early, ripens September.

Gold Drop. Good market Peach. Golden Yellow. Late September.

Elberta. An ideal market Peach, and a royal fruit, from its yellow and red skin to its stone. The size is enormous, the quality excellent, the tree vigorous and productive. Better still, the market has never yet had enough of this sort.

Early Elberta. Ripens a week earlier than Elberta.

J. H. Hale. (Midseason yellow freestone.) Ripens a few days earlier than the Elberta. Fruit is extra large, yellow, with deep carmine blush. Excellent quality and flavor. Tree is hardy, a vigorous grower and bears young. Does best when grown with S. Haven, Elberta or Rochester.

Kalamazoo. Large golden yellow with crimson cheek, one of Michigan's most popular Peaches.

New Prolific. Large, handsome yellow Peach. Sept.

RAISE PEACHES FOR YOUR FAMILY AND SELL YOUR SURPLUS

Plant Peaches in Between Rows of Young Apple Trees

Make Your Land Pay Profit Until Apples
Grow Big—Then Remove Peaches.

Rochester. A recent production, and market men particularly admire its splendid keeping qualities. It is a large, yellow-and-red freestone; flesh yellow, very highly flavored; to eat out of hand or canned it cannot be equalled as a table delicacy. Specimens measure 12 inches around and weigh 12 ounces. Stone very small and will ship as good as Elberta. The Peach comes into ripening during mid-August, when there are on the market no other yellow-and red freestones of quality, and the Rochester, therefore, commands the very highest prices. The tree comes into bearing when very young. Is a strong, upright grower, hardy as an oak. Has stood 16 degrees below zero and produced a full crop; while Elberta and Crawford, under the same conditions in same orchard, produced no blossoms and consequently no fruit.

South Haven. Tree vigorous, of semi-spreading type. Very hardy. Fruit large, roundish, thick skinned, very uniform in size. Color deep yellow with red cheek. Stone free. Prolific bearer. Ripens more than two weeks earlier than Elberta or just a few days later than St. John.

SUMMER PEARS RIPEN EARLY

Bartlett. Large size, with beautiful blush next the sun; buttery, very juicy and high flavored; bears early and abundantly. August and September, Picture shown above.

Clapp's Favorite. Large; pale lemon-yellow; flesh fine grained, juicy, melting, rich and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling the Flemish in growth. Pick the fruit at least ten days before it ripens upon the tree. August and September.

BEST VARIETY FALL PEARS

Flemish Beauty. Ripens in September and October.

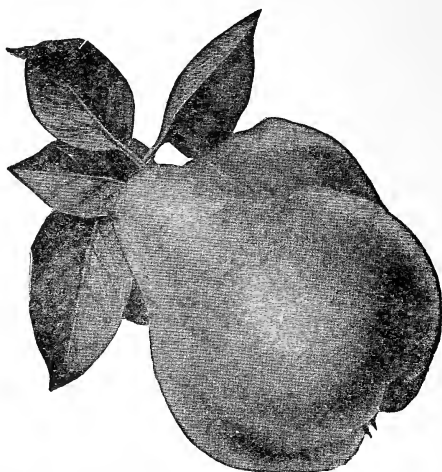

Kieffer. Profitable market variety, on account of its shipping and keeping qualities. A favorite for canning and preserving.

Seckel. One of the richest and highest flavored Pears known. Fine for desserts. A rather slow grower, but is worth waiting for.

MULBERRY TREES

Valuable for shade and ornamental trees as well as for fruit. Birds are very fond of the fruit, and for this reason Mulberry trees are often planted near cherry orchards, for birds will leave cherries alone if they can obtain Mulberries. They also attract many song birds; a lover of birds should plant a Mulberry tree.

Prices of Mulberry Trees

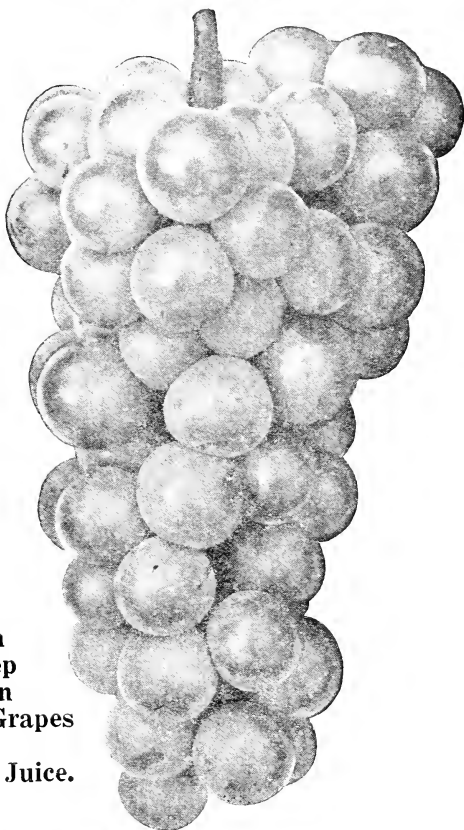

Russian, 4 to 5 ft.....	50c each
Russian, 5 to 6 ft.....	60c each
Downing, 4 to 5 ft.....	85c each

Downing's Everbearing. Fruit very large, black, handsome and best quality. Bears abundantly for three months in a year.

Russian. Very hardy and a rapid grower. Fruit small, but produced in abundance; varies from white to black.

HEDGES

for Privacy and Beautiful Effects

Barberry Thunbergi. Low, compact growing shrub, much used for border for hedge planting. Small flowers in May, followed by abundance of berries which turn to deep scarlet in winter; very fine green foliage turns to a brilliant red in autumn. They should be planted 18 inches apart, and may or may not be trimmed, as desired.

	10	100
12 to 15 inch.....	\$2.00	\$15.00
18 to 24 inch.....	\$3.00	\$20.00
24 to 30 inch.....	\$4.00	\$30.00

Privet, Amoor River. The hardiest of the Privets. It has light green leaves, is of upright growth and is the best Privet to use for hedge planting in the north. They retain their green leaves until late in the fall. Should be trimmed at least once a year, in May or early part of June. Plant 12 inches apart in the hedge.

Privet, California. Most popular half-evergreen hedge. Not so hardy as Amoor River Privet. Remarkably beautiful, glossy, dark green foliage. Strong, rapid grower. Will transplant easily and grows quickly, making hedge the first year, and succeeds in all kinds of soil. The plants should be set about 8 inches apart and cut to 6 inches above the ground after planting to make the hedge bushy at the bottom.

PLANTING INFORMATION

Order Enough Stock, Save Money

HOW FAR APART SHALL I PLANT?

The correct distance apart to plant is often a problem to planters. There are no set rules for this but with our years of experience in planting and growing, we are glad to suggest advisable distances to our customers, which will work out very satisfactorily in every way.

	Feet Apart	
Apple Trees	25	to 40
Cherry Trees	18	to 25
Plum Trees	15	to 18
Pear Trees	15	to 18
Peach Trees	15	to 18
Grapes	6	to 8
Currants	3	to 4
Gooseberries	3	to 4
Red Raspberries	3	to 4
Black Raspberries	1	by 5
Blackberries	4	by 6
Spring-bearing Strawberries	1½	by 3
Everbearing Strawberries	1	by 3
Asparagus, in field	1	by 3
Asparagus, in beds	1	by 1½

NUMBER OF TREES OR PLANTS PER ACRE

Distance	No. of Trees
1 ft. apart each way.....	43,560
2 ft. apart each way.....	10,890
3 ft. apart each way.....	4,840
4 ft. apart each way.....	2,702
5 ft. apart each way.....	1,742
6 ft. apart each way.....	1,210

35 ft. apart each way.....	35
40 ft. apart each way.....	28

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant; which, divided into the number of feet in an acre (43,560) will give the number of trees to the acre.

BLACK RASPBERRY

The Famous CUMBERLAND \$1.95 per Hundred

The Business Blackcap. It is of wonderful productiveness, producing regularly and uniformly very large crops. In size the fruit is simply enormous, far surpassing any other variety. The berries run seven-eighths and fifteen-sixteenths of an inch in diameter. In quality it is similar and fully equal to the Gregg. Very firm and is well adapted for long shipments. It is an unusually strong grower, throwing up stout, stock canes, well adapted for supporting loads of large fruit.

No. 1 strong plants70c per 25; 1.95 per 100
Bearing Age\$1.95 per 25; \$5.40 per 100

BLACKBERRIES

Alfred. The new Blackberry that has a different, delicious Blackberry flavor. Berries extra large and sweet as honey. The canes are vigorous and very hardy; bears young and profusely.

\$1.45 per 25; \$3.90 per 100

Eldorado. Very vigorous and hardy; berries very large, jet black; ripen together; very sweet, no core, excellent shipper and keeper. The leading variety.

**\$2.00 per 100 \$4.25 per 250
\$12.50 per 1000**

Strawberries Show a Big Profit on Almost Any Kind of Soil !

EVERGREENS

Choicest Trees — Lowest Prices

All evergreen trees will be carefully dug with ball of earth about the roots, and tightly secured in burlap, and will stand transportation and transplanting with little risk of loss. In planting do not remove the burlap. A thorough soaking with water twice a week when dry weather comes is advisable, especially for the first few weeks after transplanting.

ARBOR VITAE

American. Soft, green foliage in Spring and Summer, which changes to brown or bronze in winter. Rapid grower and fine for massing or hedges. 2 to 2½ ft., \$1.50; 2½ to 3 ft., \$2.25; 3 to 4 ft., \$3.25; 4 to 5 ft., \$4.25; 5 to 6 ft., \$6.50.

Berckman's Golden. A very compact, dense, slow-growing dwarf type, valuable for foregrounds and edging. The flattened leaf-lusters face outwards edgewise, presenting a beautiful surface of vertical fluted lines. The color is that fresh, bright, yellow tone of green found in Hovey's Golden, but much brighter, and is always conspicuous. 12 to 15 inches, \$2.00; 15 to 18 inches, \$3.00.

Douglas Golden. One of the hardiest. Broad bushy growth with slender branches and bright yellow foliage. 1½ to 2 ft., \$2.50; 2 to 2½ ft., \$3.25; 2½ to 3 ft., \$4.50.

Ellwangeriana. A low broad tree with slender branches and feathery gray-green foliage. 15 to 18 inches, \$1.50; 18 to 21 inches, \$2.00; 21 to 24 inches, \$2.50.

Globosa. Forms a dense, low, natural globe. Fine subjects for spacing at intervals along a foundation planting foreground, or to define driveway curves. 12 to 15 inches, \$1.00; 15 to 18 inches, \$1.50; 18 to 21 inches, \$2.00.

Hovey's Golden. A beautiful small evergreen, distinctive in shade and color, of valuable utility. It has the same leaf character and color described for Berckman's, but grows enough larger to make a splendid foundation screen beneath the house windows, or a medium filler between columnar trees. Its brilliant color harmonizes with all other types, and is conspicuous against either dark or light backgrounds. 18 to 21 inches, \$1.50; 21 to 24 inches, \$2.50.

Pyramidalis. A densely columnar type, most compact and erect of the entire species. Foliage a deep green, retaining color. The most popular pyramid for flanking the stoops in colonial architecture. 2 to 2½ ft., \$1.75; 2½ to 3 ft., \$2.75; 3 to 4 ft., \$4.00.

Siberian. A superb, hardy variety, somewhat similar to American, with heavier and fuller foliage and more compact habit; bears trimming well. This variety is extensively used for backgrounds in foundation plantings where dense bushiness is required, rather than height, 1½ to 2 ft., \$1.50.

EVERGREENS

FIR

Douglas. Very tall growing with red-brown bark. Leaves light green above, glaucous below. Of thickly conical form, spreading branches, and pendulous branchlets. Much used for lawn specimens. 2 to 2½ ft., \$2.75; 2½ to 3 ft., \$3.75.

JUNIPER

Irish. Erect, slender and formal in habit; foliage sage green, very compact; making a splendid column eventually 15 to 20 feet high; much used in cemeteries. 1½ to 2 ft., \$1.50; 2 to 2½ ft., \$2.75; 2½ to 3 ft., \$3.50.

Pfitzeriana. One of the most striking of all evergreens. The branches progress spirally along the trunk at a 45-degree angle, thereby making a good "filler"; or standing alone it acquires the symmetry of a broken column. The branches are long and whip-like, densely furnished, very dark green; the first new growth thickly studding the expanse like silver beads. 1½ to 2 ft., \$2.75; 2 to 2½ ft., \$3.75; 2½ to 3 ft., \$4.50.

Savin. Handsome moss-green foliage; adapted to use as a filler in Evergreen groups, or as a dwarf ground cover. 1½ to 2 ft., \$3.00; 2 to 2½ ft., \$3.75; 2½ to 3 ft., \$5.00.

Swedish. Tall growing, of formal, columnar habit. One of the hardiest and most reliable pillar types. The foliage is dense, fairly broad, with drooping tips; in color glaucous green somewhat lighter and bluer than the Irish Juniper. 2 to 2½ ft., \$2.50; 2½ to 3 ft., \$3.75; 3 to 4 ft., \$4.25.

Virginiana (Red Cedar). A well known American tree, with fine, dense foliage varying in habit and color, the majority being formal and bluntly conical. Makes a fine, tall tree for planting on each side of an entrance or in back of low growing varieties. 1½ to 2 ft., \$1.50; 2 to 2½ ft., \$2.00; 2½ to 3 ft., \$3.50.

Virginiana Glauca (Blue Cedar). Unlike so many varieties it is not at all formal, but without losing general compactness, its irregularity of spread is uniquely attractive; the broad conical form and beautiful glaucous blue foliage making it one of the choicest of all Junipers. 2 to 2½ ft., \$3.75; 2½ to 3 ft., \$4.75; 3 to 4 ft., \$6.00.

Waukegan. A handsome, serviceable ground-cover type, of closely radiating habit, with thread-like foliage. The color is a distinct bright, steel-blue. 1½ ft. spread, \$2.75.

PINE

Austrian. Tree remarkably robust, hardy and spreading. Leaves long, stiff and dark green; growth rapid. 2 to 2½ ft., 2.75; 2½ to 3 ft., \$3.75; 3 to 4 ft., \$5.00.

EVERGREENS

Mugho (Dwarf Mountain Pine). Of low, dense, spreading growth, with very dark foliage; very hardy. 10 to 12 inches, \$1.50; 12 to 15 inches, \$2.00; 15 to 18 inches, \$2.75; 18 to 24 inches, \$3.75; 24 to 30 inches, \$5.00; 30 to 36 inches, \$7.00.

Scotch. Like the Austrian, its quick, strong growth makes it valuable for protective screens; very hardy. As a rule it grows taller than Austrian, with softer needles, and shows a hint of reddish brown in its bark and forming cones. 2 to 2½ ft., \$2.00; 2½ to 3 ft., \$2.75; 3 to 4 ft., \$3.75; 4 to 5 ft., \$5.00; 5 to 6 ft., \$7.50.

White. A strong featured, rapid growing tree; with abundant silvery-green foliage, in long swaying clumps of soft needles. Attains great height and picturesque spread with age. 4 to 5 ft., \$6.00; 5 to 6 ft., \$8.50; 6 to 8 ft., \$11.00.

RETINOSPORA

Plumosa. An exceedingly handsome, dome-shaped evergreen of medium tall growth, from Japan; with billowing, light green foliage. 1½ to 2 ft., \$1.50; 2 to 2½ ft., \$2.00; 2½ to 3 ft., \$3.00; 3 to 4 ft., \$4.50.

Plumosa Aurea. Like the preceding, a plant of great beauty; foliage soft, plume-like, of a golden-yellow color; close and compact habit. 1½ to 2 ft., \$1.50; 2 to 2½ ft., \$2.00; 2½ to 3 ft., \$3.00.

SPRUCE

Black Hills. We wish to call particular attention to the Black Hills Spruce. The very smallest trees soon form round, sturdy, compact bodies. As the tree grows it adds to this style of growth and in most cases is the most compact growing of the Spruce family. It retains its branches close to the ground even in old trees. 1½ to 2 ft., \$2.50; 2 to 2½ ft., \$4.00.

Colorado (Pungens). A vigorous grower and hardy, makes fine specimens in a broad based, sharply defined pyramid form; foliage rigidly angular with sharp needles very densely set. Light green color. 1½ to 2 ft., \$2.00; 2 to 2½ ft., \$2.50.

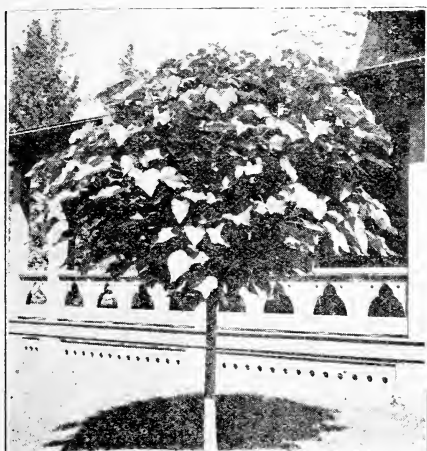

Colorado Blue (Pungens Glauca). A selected blue shade, from foregoing. This is one of the showiest and most impressive evergreens. 1½ to 2 ft., \$4.50.

Norway. A tall and grand tree of rapid growth. Most widely cultivated of the Spruces. Stands shearing well, making a fine hedge. Widely used for windbreaks. We have a large stock and will be pleased to quote in quantities. 1½ to 2 ft., \$1.25; 2 to 2½ ft., \$1.75; 2½ to 3 ft., \$2.25; 3 to 4 ft., \$3.00; 4 to 5 ft., \$4.25; 5 to 6 ft., \$6.50; 6 to 7 ft., \$8.50; 7 to 8 ft., \$9.00; 8 to 10 ft., \$12.00.

White. One of the best conifers, especially for cold climates. Compact, upright, long-lived, retaining its branches to the ground; aromatic, drought resisting; varies in color from light green to glaucous blue. 1½ to 2 ft., \$2.50; 2 to 2½ ft., \$4.

Shade and Ornamental Trees

At New Low Prices

CATALPA BUNGEI, (UMBRELLA TREE). Leaves large, dark green, lying like shingles on a roof. Forms a dense umbrella-shaped head. Very unique and a valuable lawn tree.

5 to 6 ft.....\$.98

6 to 7 ft..... 1.39

CATALPA SPECIOSA (WESTERN CATALPA). A large, rapid growing tree, widely planted both as an ornamental tree and for timber. Large, heart-shaped leaves and white flowers with yellow and purple spots.

You can have a beautiful yard—an Outdoor Living Room at remarkably low cost. We send only high grade stock. We know you will be pleased.

ALMOND, DOUBLE PINK FLOWERED. A vigorous, beautiful shrub, covered in early spring with rose colored blossoms like small roses. Our Almond are budded on hardy Kinnesota plum stock.

2 year bushes.....39c

3 year bushes.....49c

ALTHEA, (ROSE OR SHARON). This beautiful shrub flowers late in the Summer when most others are out of bloom. It bears the first year large double flowers, similar to the hollyhock, very abundantly on strong, erect branches. Choice of colors, white, red, pink, blue.

2 year bushes.....29c

3 year bushes.....39c

4 year tree form.....79c

BARBERRY THUNBERGI. (See "Hedge Plants" for description and prices of hedge size plants.)

2 year bushes.....29c

3 year bushes.....39c

BARBERRY, RED LEAVED. Description is similar to Thunbergi in all respects except that the foliage is of a bronzy red color which turns to fiery red in Autumn. Excellent for contrast in a shrubbery border. A new and perfectly hardy introduction.

2 year bushes.....49c

3 year bushes.....59c

BUTTERFLY BUSH. A comparatively new plant making an attractive show with reddish violet flowers and long, gray-green leaves. Blooms all the latter part of the Summer. Can be planted promiscuously among shrubs or in masses for a background. In severe Winter top kills back but comes up quickly next season.

2 year bushes.....29c

3 year bushes.....39c

CORNUS SIBERICA. Has an upright, spreading habit and slender, bright red branches, which add a touch of color to the shrubbery during the Winter. Abundant small, white blossoms borne in early Summer.

2 year bushes.....29c

3 year bushes.....39c

CORNUS LUTEA. Golden yellow branches which afford striking contrast to the other varieties.

2 year bushes.....29c

3 year bushes.....39c

ORNAMENTAL SHRUBS

We give good measure as to size and quality of all our shrubs, just as we do on all other kinds of nursery stock. Two year old bushes (except dwarf kinds) are usually 2 to 3 ft. in height, and bushy. Three and four year old bushes (except dwarf kinds) are usually 3 to 4 ft. high. Quality considered, we believe our prices to be the lowest in the field.

COTONEASTER ACUTIFOLIA. A fast growing shrub, tall enough to be used in outside living room border, with spreading, slender branches and 1½ to 2 inch leaves. Clusters of flowers in May and June, black fruits in September.

- 2 year bushes.....49c
- 3 year bushes.....59c

DEUTZIA GRACILIS. An excellent edging shrub, particularly attractive when studded with its covering crop of beadlike buds. Dwarf growing, dense, bushy, its drooping branches wreathed with pure white flowers in May. Does very well in shade.

- 2 year bushes.....34c
- 3 year bushes.....44c

DEUTZIA LEMOINE. Medium large flowers of pure white, borne in cone-shaped heads in June. This is the principal intermediate variety between dwarf and tall growing types, attaining about 4 feet in height. Does well in shade.

- 2 year bushes.....39c
- 3 year bushes.....49c

DEUTZIA PRIDE OF ROCHESTER. Beautiful white flowers, tinged with rose on outside in May. Grows bushily and slowly, 6 to 8 feet high.

- 2 year bushes.....34c
- 3 year bushes.....44c

ELDER, GOLDEN. Its golden yellow leaves contrast beautifully with the other shrubs. Is very conspicuous in every planting. Quick to establish itself, robust grower and attractive.

- 2 year bushes.....39c
- 3 year bushes.....49c

FORSYTHIA FORTUNEI, (GOLDEN BELL). One of the earliest shrubs to bloom, and very early in the spring, before the leaves appear, they are completely covered with masses of rich, golden yellow flowers. The foliage is dark green and they are well adapted for massing, and succeed in both sunny and shady places. Should be used in every outside living room border.

- 2 year bushes.....29c
- 3 year bushes.....39c

HONEYSUCKLE BELLA ALBIDA. An attractive honeysuckle bush of strong growth. Fragrant clusters of white flowers in May, followed by conspicuous red berries. All varieties of honeysuckle are among the most desirable shrubs. Fine for tall hedges, can be kept trimmed. Use them freely in outside living room borders.

- 2 year bushes.....29c
- 3 year bushes.....39c

HONEYSUCKLE TATARIAN. Bright pink blowers borne in great abundance and fresh, rounded foliage.

- 2 year bushes.....34c
- 3 year bushes.....44c

HONEYSUCKLE MORROWIL. A shrub with wide spreading branches and dense foliage. 4 to 6 feet high. The creamy-white flowers appear very early in the spring and are followed by bright red berries. One of the best of the honeysuckles.

- 2 year bushes.....34c
- 3 year bushes.....44c

HONEYSUCKLES, LILACS AND HYDRANGEAS

**Favorites Since Colonial Days, are Now
More Popular Than Ever.**

HONEYSUCKLE FRAGRANTISSIMA. A large shrub with numerous spreading branches, growing 8 to 12 feet high, and blooming in March and April, with deliciously fragrant pink and white flowers.

3 year bushes.....49c

HYDRANGEA ARBORESCENS. Has the appearance of a low growing Snowball with its large, flat clusters of white flowers in June and July. Blooms the first season, and especially useful in shady places.

2 year bushes.....34c

3 year bushes.....44c

HYDRANGEA PANICULATA GRANDIFLORA. One of the most popular shrubs in cultivation, and adapted to varied uses. May be planted in hedges, beds, groups, scattered among other shrubs in massed plantings, or planted alone as a specimen, and produces an attractive effect wherever placed. Flowers in August, in huge panicles from 8 to 12 inches long, of a delicate pink, changing to bronze and lasting until Autumn. A very effective and desirable shrub.

2 year bushes.....34c

3 year bushes.....44c

KERRIA JAPONICA. A very desirable shrub of spreading habit, with green stems, bearing single yellow flowers in June, attaining a height of 3 to 4 feet. Does well in partial shade.

2 year bushes.....39c

3 year bushes.....49c

KERRIA, WHITE. A distinct plant and very attractive, with bright green leaves and pure white flowers in late spring. Later come black berries that hang on all Winter. Grows 4 to 5 feet high. Does well in shade.

2 year bushes.....39c

3 year bushes.....49c

LILAC, COMMON PURPLE. The well known, old fashioned, purple lilac.

2 year bushes.....29c

3 year bushes.....39c

LILAC, COMMON WHITE. Slender, upright.

2 year bushes49c

3 year bushes59c

LILAC JOSIKAEA. Stout, erect growth, dark shining leaves and purple flowers in June.

2 year bushes49c

3 year bushes59c

LILAC, PERSIAN PURPLE. The most popular and useful of all the Lilacs.

2 year bushes34c

3 year bushes44c

PRIVET, AMOOR RIVER.

(See "Hedge Plants" for description)

2 year bushes15c

3 year bushes25c

PRIVET, CALIFORNIA.

(See "Hedge Plants" for description.)

2 year bushes10c

3 year bushes15c

PRIVET, IBOTA. A native of China and Japan. Foliage long and shining. Flowers large, white and fragrant.

2 year bushes15c

3 year bushes20c

PRIVET, REGEL'S. A strong, very hardy type, with dark and shiny leaves. The numerous branches are stiff, twiggy and horizontally spreading, gracefully drooping at the ends. Makes a naturally wide, dense bush, particularly adapted to foundation planting.

2 year bushes18c

3 year bushes28c

HERE ARE SOME OF THE NICEST SHRUBS—

VARIETIES ALL HOME LOVERS SHOULD HAVE IN THEIR GARDENS

PRUNUS NEWPORT. A Purple Leaved Plum of greater refinement and slower growth, the leaves smoother and more richly colored; at first strongly reddened, maturing to a still red tinge in the deep bronze-purple of late summer. Flowers rosy-white, fruit magenta red.

2 year bushes49c
3 year bushes69c
4 year bushes98c

PRUNUS PISSARDI. (The Original PURPLE LEAVED PLUM). Showy, pinkish-purple leaves that deepen in color to the end of the season. A small, round topped tree, with white single flowers in spring.

2 year bushes49c
3 year bushes69c
4 year bushes98c

PRUNUS TRILOBA (FLOWERING PLUM). A small shrub with downy leaves and double roses or pink flowers which appear just before leaves unfold. Very showy and a favorite. Sometimes known as Rose of China.

2 year bushes49c
3 year bushes59c

PHILADELPHUS AUREA. A beautiful dwarf shrub, with golden yellow foliage. Keeps its color the entire season if planted in the sun. Splendid for grouping with other shrubs in border planting.

2 year bushes49c
3 year bushes59c

PHILADELPHUS CORONARIUS. This is the old fashioned, sweet scented Mock Orange or Syringa. Blooms in May in very graceful sprays. Good for tall screens. Ideal shrub for the outdoor living room border.

2 year bushes39c
3 year bushes49c

PHILADELPHUS LEMOINE. Erect, fine leaved, slender stemmed, growing about 4 to 5 feet high. Creamy-white flowers in June, with a distinct, permeating fragrance. A splendid filling-in shrub behind dwarf types.

2 year bushes39c
3 year bushes49c

PHILADELPHUS VIRGINAL. A magnificent new variety. Moderately tall, with good foliage and compact habit. The flowers are double and semi-double, and are the largest, handsomest and most sweetly fragrant of any known variety with longest early and intermittent blooming season. Best of the modern Mock Orange.

2 year bushes39c
3 year bushes49c

SPIREA BILLARDI. Has dense spikes of rose-pink flowers that crown sparsely twigged, erect branches. Grows 5 feet high.

2 year bushes29c
3 year bushes49c

SPIREA DOUGLASSI. Rose colored flowers in large spikes. Blooms nearly all Summer. Very pretty and showy, and splendid for cut flowers. Grows 4 feet high.

2 year bushes39c
3 year bushes49c

SPIREA FROBELI. A very free growing dwarf shrub, producing large flat heads of rosy pink flowers in the spring. Green foliage tinted dark red.

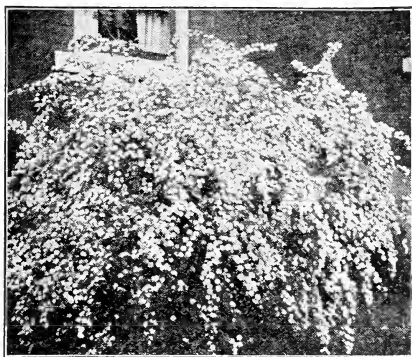

2 year bushes29c
3 year bushes39c

SPIREA OPULIFOLIA AUREA. Growth upright attaining 5 to 7 feet, although the heavy white flower umbels in June make the branches droop; Old flower heads turn to dark red, making a striking variety of colors at different stages of maturity. Young foliage of bright yellow changing to golden bronze in the fall.

2 year bushes39c
3 year bushes49c

SPIREA VAN HOUTTEI

Low as 14c each

A Mountain of White Charm and Beauty
most charming and beautiful of all the varieties,

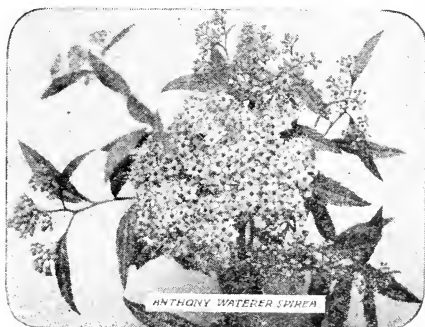

SPIREA VAN HOUTTEI. This is undoubtedly the most charming and beautiful of all the varieties, having pure white flowers in clusters, the branches drooping to the ground. Foliage a rich green. Very profuse in bloom and plants remarkably hardy. An indispensable ornament for lawn or hedges, and probably the most widely planted shrub in cultivation. Commonly but erroneously called Bridal Wreath; the true Bridal Wreath is Spirea Prunifolia. Grows 5 to 6 feet.

1 year bushes....14c

2 year bushes....19c

3 year bushes....29c

4 year bushes....39c

SPIREA ANTHONY WATERER. Dwarf, bushy, of spreading type and fairly covered in June with large corymbs of rose crimson flowers. If these are removed as they fade the bush will bloom at intervals until frost.

2 year bushes29c

3 year bushes39c

Every Home Should Have Spireas

Beautify Your Home With Shrubbery

See What a Difference This Lovely
Hydrangea P. G. Makes

SNOWBALL. The old fashioned Snowball with its large, globular clusters of snow white flowers in May and June makes a very attractive shrub and is usually in bloom for Decoration Day.

2 year bushes39c

3 year bushes49c

SNOWBERRY, WHITE. A slender branched, upright growing shrub, with small, pink flowers, followed by showy, pure white berries which cling to the branches to midwinter. The combination of pink flowers and white berries on the same twig as charming.

2 year bushes29c

3 year bushes39c

SNOWBERRY, RED (CORAL BERRY). Valuable for planting in shady places, as the foliage is very persistent. The fruit is a purplish-red and hangs on well into the Winter. Flowers small and rose colored.

2 year bushes29c

3 year bushes39c

SUMAC (CUT LEAVED). A strictly nursery grown variety, its leaves being deeply cleft, which, if bush is induced to produce considerable bottom growth, mingles the various angled fronds in a delightful "ferny" effect.

2 year bushes59c

3 year bushes49c

TAMARIX AFRICANA. A beautiful shrub with small, feathery foliage similar to the Juniper. Delicate, small, pink flowers. Blooms in May and grows 10 to 15 feet high.

2 year bushes39c

3 year bushes49c

WEIGELA EVA RATHKA (RED WEIGELA). The most distinct and one of the most attractive varieties. Flowers brilliant crimson, and when in bloom in July exceedingly showy. Of smaller growth than the other Weigelas, and spreading in character.

2 year bushes39c

3 year bushes49c

4 year bushes69c

WEIGELA ROSEA. Most common and popular of the Weigelas. Tall grower, bright pink flowers in profusion during June.

2 year bushes29c

3 year bushes39c

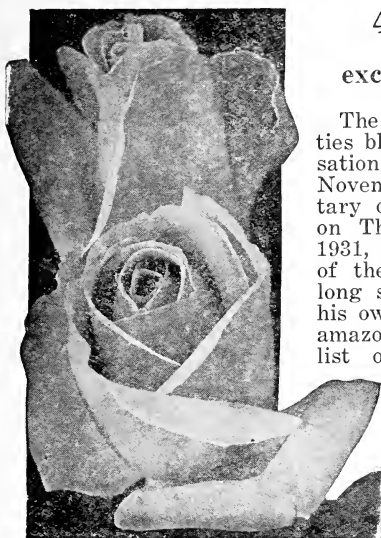

4 year bushes59c

WEIGELA VARIEGATA. Dwarf; variegated leaves, flowers pink, one of the most useful variegated shrubs. Much used in foundation plantings.

2 year bushes39c

3 year bushes49c

EVERBLOOMING ROSES

49c each

except as noted

The following varieties bloom without cessation from June until November. The Secretary of our Company on Thanksgiving Day, 1931, cut three dozen of the most beautiful, long stemmed roses in his own garden in Kalamazoo, Michigan. We list only thrifty and free blooming varieties that by actual test in Kalamazoo County have proved satisfactory.

Your choice of any rose in this group, strong, 2 year old, No. 1 bushes, that will bloom this summer, except as noted at 49c each.

Columbia. A beautiful, true, deep enduring pink.

Dame Edith Helen. A magnificent, fragrant, full-bodied new rose of many substantial petals which curl back prettily, holding steadily to one vivid pink color. 69c each.

E. G. Hill. Great massive blooms of deep maroon, velvety on inside and glistening on outside. Very perfumed with old rose fragrance. \$1.25 each.

Etoile de France. Vivid crimson with darker shading.

Etoile de Hollande. A vigorous, healthy grower and free bloomer, improving year by year (like Radiance). The flowers are a brilliant crimson red, particularly charming in the half-grown state, continuous all summer. 89c each.

Francis Key Scott. Red, shading to cerise.

General MacArthur. Dazzling crimson-scarlet, exquisitely perfumed.

Gruss en Teplitz. Scarlet, constantly in bloom.

Hadley. Rich, velvety crimson.

J. J. L. Mock. Outside petals deep pink, inside silver and rose

John Russell. Of all recently introduced red roses this is one of the most generally pleasing. The fully double flowers are large and solid, produced in abundance on strong stems; the foliage attractively dark and shiny. Vivid red with velvet cardinal shadings. 69c each.

K. A. Victoria. White, fine form.

Killarney. Pink, an old favorite.

Lady Hillingdon. Deep apricot yellow.

EVERBLOOMING ROSES

2 Year Bushes—49c

except varieties noted

Los Angeles. Luminous flame-pink, toned coral, shaded translucent gold at base of petals.

Madame Butterfly. A glorified sport of Ophelia, a symphony in bright pink-apricot and gold.

Madame Caroline Testout. Silvery rose, deepening at center to pale cherry red.

Mrs. Charles Bell. Soft shell-pink with salmon background.

Patience. Fine, pointed buds of scarlet-orange, opening to fragrant double blooms shaded from orange to rich garnet suffused with copper, getting more pronounced at the base. \$1.25 each.

Pink Radiance. Extra hardy, vigorous, prolific. One of the best all around garden Roses. Color is a beautiful blending of carmine with shades of opal and copper.

President Herbert Hoover. A glorious new multi-colored Rose unfolding its broad, thick petals unhurriedly from the beautiful pointed bud. Vivid cerise pink, softly flamed with yellow, orange and scarlet; this combination most emphatic on the reverse. The perfume is exquisite; the foliage ornamental. \$1.25 each.

Red Radiance. Similar to Pink Radiance; a brilliant crimson. No garden is complete without several Radiance Roses.

Rev. H. Page Roberts. A fine, big, colorful rose, glorious in the cooler days of autumn. A full, shapely flower, golden-yellow stained outside with red; the copper-red buds are extra long. 89c each.

Souvenir de Claudius Pernet. Best new unflower yellow.

Souvenir de Georges Pernet. The color is a cheerful succession of reds. Bush very sturdy, 69c each.

Talisman. The most gorgeous assemblage of colors in one flower ever presented by a rose. Here are the strong colors exhibited, mostly in well defined angular blocks; gold, apricot-yellow, blood-orange, deep pink and old rose. The bud is long and shapely, developing into medium-sized, compactly double flowers; a free bloomer with glossy foliage. 89c ea.

Miscellaneous Roses

low as 39c each

BABY RAMBLER. The original light crimson sort, with fine heads of small flowers. Seldom grow higher than 18 to 24 inches and bloom from June until fall. A fine edging plant. 39c each.

HUGONIS. Sometimes called "The Golden Rose of China". The 2 inch flowers are single, set snugly full length of last year's arching canes. The bush has the proportions of a shrub. 49c each.

WICHURIANA. Creeping Memorial Rose. Especially valuable for cemetery planting, the best ground-covering Rose. Pure white, single flowers in July. 49c each.

ROSE RUGOSA. Flowers deep rose, borne in clusters, and are succeeded by winter persistent fruit. 39c each.

Climbing American Beauty. The moderately fragrant, rich rosy-crimson, three-fourths inch flowers are produced in great abundance.

Crimson Rambler. Great masses of crimson, semi-double flowers are borne by these vigorous plants. Desirable pillar and porch plants.

Dorothy Perkins. One of the most notable Climbing Roses. Clear cherry-pink, slightly fragrant; borne in great profusion and lasts a long time.

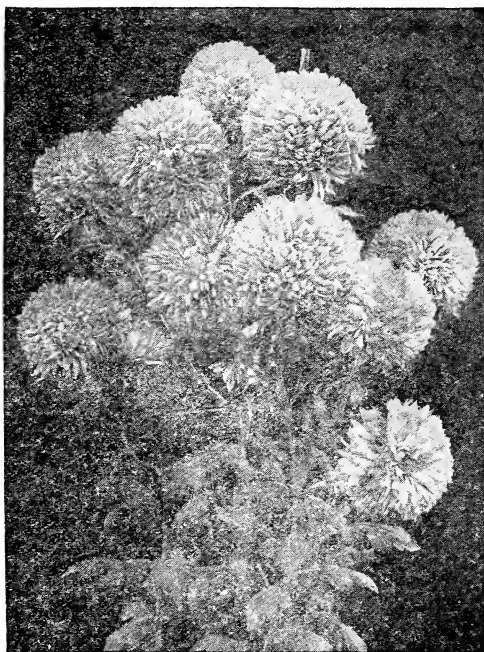

Dr. Van Fleet. Probably the best Climbing Rose in cultivation. Perfectly formed, long, pointed, deep pink buds on long stems, with several in a cluster that open to a lighter shade of pink.

Excelsa. An intense crimson, with the edges of the petals a little lighter, produced in immense clusters.

Paul's Scarlet. The brightest and purest red of all the Pillar Roses. No other Rose, in any class, can compare with this for brilliancy of color, which is vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes. It is of strong climbing habit and perfectly hardy. One of the most popular Climbing Roses.

White Dorothy. Closely resembles Dorothy Perkins except for its immense clusters of pure white flowers. The most valuable white climber of its class.

Instructions for Ordering

HOW TO ORDER

Use our order blank, write plainly, giving name and address in full, county and state and shipping point if different from Postoffice.

YOUR REMITTANCE

Send a post office or express money order if possible; cash should be sent by registered mail **ONLY**, or if you wish, send your personal check.

TERMS

Cash with order. However, we will ship C. O. D. if one third of the total amount is sent to us in advance. No stock or orders booked or reserved unless part payment is made on same.

Transportation charges paid by customer on receipt of stock. This usually saves you money.

WE SHIP ALL POSTAL ORDERS

C. O. D. FOR POSTAGE

Do not send us any money to prepay parcel post charges. It is better and costs you less to pay on delivery. Postal clerks give C. O. D. for postage parcels better service. If you wish your order by mail, just say "SHIP BY PARCEL POST".
